

## QUALITY SINCE 1840™

Bunn-O-Matic Corporation can trace its foundation to 1840 when Jacob Bunn opened his grocery store in a developing Springfield, IL USA, and a young Abe Lincoln was one of his first customers.

That venture grew into Bunn Capitol Wholesale Grocery Company and was later managed by George R. Bunn who founded a beverage equipment division in the late 1950's. Bunn-O-Matic Corporation was officially incorporated as a separate entity in 1963, and since that time has been at the forefront of dispensed beverage equipment manufacturers.

The company remains privately-held and family-owned through five generations of Bunn family entrepreneurship. It has evolved from a foodservice and coffee focus to include a long list of equipment innovations in all dispensed beverages. Now often referred to simply as "BUNN," the company has become a global partner you can count on for profitability, reliability and support wherever customers are served.

# trifecta® Air Infusion®

Tech-enabled, barista-crafted single cup brewer that heightens the quality of coffee and tea

## TRIFECTA BREWING PHASES

**Wetting:** The saturation of the coffee grounds and specialty loose leaf tea can be controlled to get the percentage of water and pause appropriate for the selected varieties.

**Extraction:** Air is injected into a pressurized chamber so that the grounds are agitated using Air Infusion technology. The result: uniformity of extraction and a complex beverage that will be enjoyed by coffee and tea enthusiasts.

**Hydrolysis:** Air presses the beverage through a permanent metal screen that filters out coffee grounds or tea leaves while preserving oils and aromatics for a deep-bodied, unique flavor experience.

# Paper Filters

Selection of coffee filters is a vital step in brewing perfect coffee - don't settle for anything less than BUNN® quality coffee filters. Using the results of years of research, BUNN manufactures the best filters from high quality, heavy weight paper, so the water flows properly through the coffee. Our filters are uniquely designed for strength with taller walls to help reduce overflow and grounds in your coffee.

BUNN's paper stock used in the manufacturing of our coffee filters is produced using an elemental chlorine-free (ECF) bleaching method.
